

Title : Diagnosis and surgical Management of Lung Cancer:

Speakers: Ara Chrissian and Ara Klijian

Learning Objectives

1. Understand the definition of lung nodule, and delineate the difference between a nodule and a mass.
2. Understand the work up of lung nodules, including new technologies that I've been developed within the past several years.
3. Understand newer surgical techniques, including lung surgery under local anesthesia that have been developed that allow for less invasive procedures for the treatment of lung nodules and malignancies
